Leaders in the commercialization and global supply of premium energy resources.

About us

Experience and innovation in the global energy sector.

Our business group, backed by a team of professionals with over 30 years of expertise in the international energy sector, specializes in the import, distribution, and supply of petroleum derivatives, biofuels, natural gas, and LNG for the industrial, automotive, and maritime (Bunker) sectors across Europe, the Americas, and Africa.

Our international range positions us as a strategic partner in advancing the international energy sector. As pioneers in promoting, developing, and executing of profitable and sustainable energy projects, we uphold the highest quality, transparency, and trust standards.

Energy solutions designed for the new way of energizing the world.

viroque group

An international business group comprising over 12 companies specialized in energy solutions and their international distribution in the markets of Europe, America, and Africa.

viroque energy

A company specialized in commercialization, distribution, and supply of gas, electricity, and the development of renewable energy projects in Spain and Europe. A trading and international logistics company for LNG.

viroque petroleum

An operator company in the hydrocarbons market, with a wholesale focus on the major European energy markets, supply, and distribution agreements at the international level.

Our commitment

Compliance y transparency:

The pillars of our operations and commercial management.

At Viroque, we have a **Compliance Management System** aligned with the UNE-ISO 37301 and UNE-19601 standards for Criminal Compliance Management Systems. This framework ensures that our policies and controls **meet the highest international standards**, promoting a **culture of integrity** and ensuring **compliance with applicable legal, ethical, and regulatory requirements** at both national and international levels.

Our **system is designed to prevent, detect, and manage compliance risks**, allowing continuous improvement and adaptation to regulatory changes. This commitment underscores our organization's dedication to maintaining high standards of compliance.

Differentiating Proposal

We believe in a new approach of energizing the world.

In a competitive and ever-changing environment, we are committed to an **innovative** commercial approach that responds **swiftly and flexibly** to the needs of our partners. We focus on providing solutions for the international secondary energy market and end customers in the areas of traditional fuels, bunker, biofuels, and renewable energy projects.

Currently, **we endorse international seals and certifications that guarantee our commitment and consistency** throughout our value chain, ensuring environmental responsibility and strong relationships with our stakeholders. We are always dedicated to contributing to our clients' energy transition.

**TRADITIONAL
FUELS**

Commercialization of gasoline and diesel, importation, and product delivery in Spain through the Exolum (CLH) network and independent terminals.

Import, export, and comprehensive coordination of shipping operations for first and second-generation biofuels between Europe and America.

**BIO-
FUELS****BUNKER**

Coordination of back-to-back operations in the main Spanish ports and physical bunker supply in high-traffic international maritime markets.

Comprehensive management of logistics services for trading and delivery of energy products in Spain, Europe, America, and Africa.

SHIPPING**ELECTRICITY &
RENEWABLE
ENERGY**

Licensed suppliers for electricity supply in 8 European countries; promoters and developers of renewable energy projects in Spanish territory.

International marketing and distribution of natural gas (through the ENAGAS network) to the entire Spanish market; import and maritime LNG transport logistics.

**NATURAL GAS &
LNG**

Our value proposition

Diesel y Gasoline

1 OUR PROPOSAL

We handle the **import, operation, and trading** of scarce and high-quality product shipments within Spanish territory, the Mediterranean, and South America, with **constant stock availability** and through specialized and **continuous commercial support**, from purchase to delivery.

2 PRODUCTS

In Spain, we import scarce products such as **Diesel** and **Gasoline** into the system, distributing them to the main terminals in the country through the **Exolum network** or via direct logistics to the most recognized **independent terminals**.

Our international reach allows us to market **GOB** and **GOC** at highly competitive prices to secondary market customers within the energy sector, alongside other products to companies in the **industrial, maritime, and automotive** sectors.

Biofuels

1 OUR PROPOSAL

We are **suppliers of sustainable products** that contribute to the **decarbonization of transportation** in all its forms: **automotive, maritime, and aviation**. We have **strategic agreements** with the world's leading biofuel producers and storage facilities at **major hubs across Europe**.

2 PRODUCTS

Our **products** are **certified** under the **international ISCC scheme** and offer up to **90% CO₂ emission savings** compared to conventional fuels. Within our portfolio, we can supply both 1st and 2nd generation biofuels: **HVO** (Hydrotreated Vegetable Oil), **FAME** (Fatty Acid Methyl Ester), Ethanol/Bioethanol, and **SAF** (Sustainable Aviation Fuel).

As part of our commitment to the energy transition, we include **2nd generation fuels** in our portfolio, adhering to the **sustainability schemes of the Netherlands** (DDC), **Germany** (Nabisy), and **Spain** (SNVS).

Bunker

1 OUR PROPOSAL

Our **commercial capacity**, **strategic agreements** with the leading international trading houses, and the **global coverage** of the Viroque Group position us as a key ally for **physical supply** in Spain and America, as well as a leader in **back-to-back operations** at any port in the world.

2 PRODUCTS

Our current Bunker offering includes a broad portfolio of **energy products** and **lubricants** for the maritime industry, highlighting high-quality products such as **MGO** (Marine Gas Oil), **VLSFO** (Very Low Sulfur Fuel Oil), **HSFO** (High Sulfur Fuel Oil), **bio-based Bunker Oil**, and the leading **lubricant** brands in the market.

Our operational and supply reach covers **markets** such as **Bilbao**, **Gijón**, and **Cartagena de Indias**, **Colombia** for the physical supply of VLSFO 0.5% and MGO, via barges for Colombia and barges, tankers, or pipelines in Spain. Our operational expansion plan includes **at least 5 new ports by 2025**.

Gas and LNG

1 OUR PROPOSAL

We handle the **marketing**, **logistics**, and **storage** of **Natural Gas**, **LNG**, and **Certificates of Origin** from the source to the industry, managed by our highly qualified professionals.

We assist our clients in ultimately managing of their supply chain, meeting their needs, offering **specialized support**, and providing **tailored solutions** at every stage of the process, **to optimize their energy management**.

2 PRODUCTS

We have a wide portfolio of products for **electricity** generation, **heating**, and **energizing industrial processes**. We offer flexible price indexing in natural gas and LNG, presenting tailored proposals to our clients. We also handle the **subleasing** of **strategic reserves** and **arbitrage**.

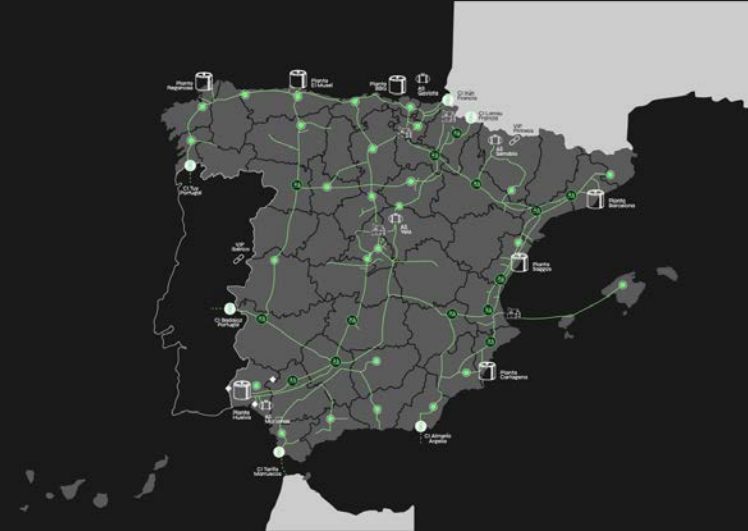

3 INTERNATIONAL MARKETS

We offer natural gas and LNG, operating in the main European markets:

- Spain (PVB, TVB, AVB),
- Portugal (VTP),
- France (PEG),
- Italy (PSV),
- United Kingdom (NBP),
- Germany (THE),
- Belgium (ZTP),
- Netherlands (TTF),
- Austria (VTP).

4 DISTRIBUTION IN SPAIN THROUGH THE ENAGAS NETWORK

VISION 2023

To establish ourselves as **one of the leaders in the secondary energy market at the European level**, tripling the volume of **natural gas** sold to date, reaching **20,000,000 MWh annually**.

Through continuous innovation, the expansion of our distribution network, and a commitment to sustainability, we aim not only to meet the growing energy demand of our customers but also to contribute to the energy transition. We want to be the trusted partner for industry and consumers, offering safe, reliable natural gas solutions tailored to the needs of the future.

Shipping

1 OUR PROPOSAL

We offer quality **logistics solutions**, carrying out small and medium-scale shipments, **primarily between European ports**. As part of our 2025 Strategic Plan, we have prioritized the expanding of shipping services outside the domestic territory, aiming to become a key charterer in the market, under high standards of **quality** and **operability**.

2 TRADING RECORD

Our shipments include the volume movement between Spanish ports such as **Barcelona**, **Motril**, **Palma**, and **Cartagena**. The international logistics management of products has involved **biofuel shipments**, primarily in the **ARA** region (Amsterdam, Rotterdam, Antwerp), totaling **more than 70,000 CBM** and over **90 million USD** in revenue.

Electricity

1 ELECTRICITY MAP

We are licensed for electricity commercialization in more than 8 countries:

- Spain
- Portugal
- France
- Germany
- Italy
- United Kingdom

2 VISION 2030

In line with our vision of the **energy transition**, we are joining efforts to **create energy communities** at an international level through **PPAs** (Power Purchase Agreements), where, in addition to marketing electricity, we propose the **development of innovative energy generation projects from renewable sources** such as Wind, Hydroelectric, Photovoltaic, Green Methanol, Green Hydrogen, and sustainable storage technologies.

Renewable Energies

1 OUR PROPOSAL

Committed to sustainable energy transition, we promote and develop renewable energy projects in Spain and Europe. Our work includes creating and managing photovoltaic plants, wind farms, and Stand-Alone BESS (Battery Energy Storage Systems).

Viroque Energy aims to contribute to the increase of renewable energy in the national electricity mix and the goals of the PNIEC 2030, with a target of managing more than 300 MW of installed renewable energy generation capacity.

2 PROJECTS

INDUSTRIAL SELF-CONSUMPTION

Technology: PV + BESS
Power: 34 K MWp
BESS: 5.5 MWp

ENERGY STORAGE

Technology: BESS
Power: 10 MW
BESS: 15 MW

PV GENERATION SOUTH OF SPAIN

Technology: PV
Power: 60 MW
